Notes on waste disposal

Recycling of packaging materials

In the interest of environmental protection, please contact your local government's recycling or solid waste management department to learn more about the services it provides.

Waste disposal of electric and electronic equipment

Electronic equipment or batteries cannot be discarded along with the normal household waste. Keep for more information on the recycling and disposal methods envisaged by the local regulations in your area.

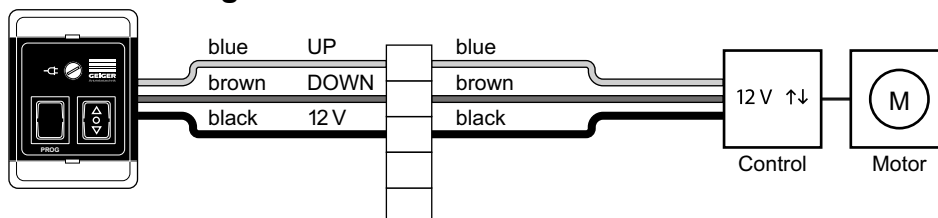

Setting switch ...

... for GJ5606 AE10. RESCUEline.

Connection of the setting switch

-  Only the setting switch M56F155 may be used for setting the RESCUEline. The setting switch M56F155 works with potential-free contacts.
-  The work with the service terminals may be accomplished only by an electrical specialist.
-  Information: The programming key corresponds to the simultaneous operation of the UP and DOWN keys.

Connection of the setting switch

GEIGER motors GJ5606 AE10. RESCUEline

-  Note: please refer to the installation and operating instructions of GJ5606 AE10. RESCUEline to adjust the end positions.
-  Do not connect plug connectors that are used for 230V to the connection for the operating or setting switch.
If 230V is connected incorrectly to 12V connections, the device will be destroyed and all 12V circuits will be put under mains voltage. Incorrect connection can lead to death and serious injuries due to electric shock.
