

Declaration of Manufacturer

Gerhard Geiger GmbH & Co. KG
Antriebstechnik
Schleifmühle 6
D-74321 Bietigheim-Bissingen

We declare under our sole responsibility that following products:

Product designation: Venetian blind motor, motor for rolling shutter, motor for awnings

Type designation: **GR45..**
GU45..
GJ56..
GSI56..

are in conformity with the minimum requirements of the directive DIN EN 14202 dated October 2004.

Tubular motors: 7.000 cycles (GR45.., GU45..)
Venetian blind motors: 10.000 cycles (GJ56.., GSI56..)

Tests for product types that cannot be realized according to EN 14202 due to customer-specific design or special software functions are excluded from the declaration.

Divergence from the norm: For technical reasons, chains with chain wheels are being used instead of traction cables and drums as prescribed in the directive EN 14202. The reference circle of the chain wheel shows minimum divergence in relation to the diameter of the drum. The test load, as well as the test way are adapted to this diameter. Due to the strong thermal load at the test rig, the outflow of tiny amounts of lubricants is unavoidable.

Dr. Marc Natusch (General Manager)
